

UCD7	Fitness/walking link
Description	The link which could possibly be accessed from a dropdown menu/side-bar menu will take the user to a page where they can review their number of steps
Precondition	<ol style="list-style-type: none"> 1. App must be installed and allowed to run in the background or App must be given permissions to use the pedometer services
Assumption	The user has location services on as well as a pedometer active
Cases	<ol style="list-style-type: none"> 1. The user is able to scroll down and view a list of active participants 2. The user is able to see their favourite routes 3. The user is able to see a weekly/monthly/systematic track of their progress
Expected Results	<ol style="list-style-type: none"> 1. The list should include all users who actively use the service 2. The list should only display bits of the list and load more as necessary so as to save data 3. The user should be guided through an easy interface to their statistics and track progress
