NavUP - SRS Use Case: View Traffic Congestion

SJ du Plooy (12070794)

February 22, 2017

Use Case Element	Description
Use Case Name	View Traffic Congestion
Use Case Description	The user will be able to plan ahead by viewing the current traffic congestion to a desired location, and can then decide whether he or she has time to travel to that location, or would rather go at a later stage.
Primary Actor	Student/staff/guest
Precondition	The user must be within the campus map boundaries and have an active Wi-Fi connection.
Trigger	When the user taps on the feature to view traffic on a given route.
Basic Flow	When the user is on the main screen of the application, the user can: 1. Tap on "View Traffic Congestion" 2. Pick a destination 3. Then see the approximate congestion from the user's current location to requested destination.
